Experience

Propvia

June 2025 – August 2025

AI Software Developer Intern

Detroit, MI

- Engineered an **LLM-powered property search** using **TypeScript/Node.js** that transforms natural-language queries into structured filters, **ranking Supabase** listings and **returning top matches** via **strict JSON parsing**.
- Implemented **LLM-driven ranking and filtering** logic in **JavaScript**, handling prompt orchestration, response validation, and fallbacks.
- Architected **10+** authenticated **REST APIs** using **Node.js/Express.js**, documented with **Swagger**.
- Designed the **Supabase** data layer, implementing **Row – Level Security (RLS)** for data segregation.
- Spearheaded **JavaScript-based usage tracking** and quota enforcement for **AI calls** to support tiered subscriptions.
- Built an asynchronous **Node.js ingestion pipeline** processing **1,000+ listings/day** for AI-powered search.
- Integrated **Stripe** and **Postmark** via **Node.js** for payment and notification, reducing manual operations by **~40%**.
- Streamlined **CI/CD pipelines** for **JavaScript services** using **GitHub Actions**, cutting deploy time by **~60%**.

Boston Scientific (TCS)

October 2021 – August 2024

Software Engineer (System Engineer)

India

- Developed backend **microservices** in **Python (FastAPI)** and **integrated** with **AWS Lambda** for event-driven workflows, **cutting infrastructure costs** by **30%**.
- Designed and **implemented** a data validation layer within the ingestion microservice (FastAPI), **preventing 99% of data schema errors** from reaching the production database.
- Re-engineered legacy **ETL workflows** into scheduled **Python services**, **automating processing of 10K+ records** and **accelerating reporting** by **70%**.
- Created **15+ RESTful APIs** (authentication, reporting, data ingestion), supporting **1K+ daily requests** and **improving developer adoption** by **40%**.
- Automated **CI/CD** with static analysis and unit testing, **remediating 600+ issues** and ensuring **99.9% uptime**.
- Centralized logging and monitoring solutions using **AWS CloudWatch** and **Grafana**, **reducing MTTR** by **35%**.

Projects

Real-Time WebRTC Video Calling Platform | WebRTC, Node.js/Express, Docker, STUN/TURN

[Github Link](#)

- Programmed a real-time platform using **WebRTC** and **WebSocket programming** for signaling and media negotiation; **optimized socket flow**, **reducing call join time** by **30%**.
- Developed the backend (**Node.js/Express**) with **STUN/TURN** integration for connectivity and **hardened security** using **JWT-based auth** and **Docker/CI/CD** for deployment.

SmartMate: AI-Agent Personal Assistant | FastAPI, LangGraph, Google Calendar API

[Github Link](#)

- Forged an **NLP-driven assistant** for WhatsApp, automating scheduling, updates, and note-taking services.
- Leveraged **GPT-based intent recognition** to **reduce manual effort** by **90%** through intelligent task automation.

Cloud-Hosted Expense Tracker Web App | MERN, AWS EC2, Nginx, PM2

[Live Demo](#)

- Architected and **deployed** a full-stack **MongoDB, Express, React.Js, Node.Js** (MERN) app on **AWS EC2/Nginx**, implementing **Auth flow**, **API contracts**, and **Centralized Error Handling**.
- Integrated **CI/CD** with **Redux** state management, automated deployment, **reducing reporting** by **80%**.

Technical Skills

Languages: **JavaScript, TypeScript, Python, SQL**

Frameworks/DBs: **Node.js, Express, FastAPI, Flask, React.js, PostgreSQL, MongoDB, Supabase, Redis**

Cloud/DevOps: **AWS (S3, Lambda, EC2), Docker, Kubernetes, Terraform, GitHub Actions, Kafka, ETL, Git**

Concepts/Tools: **Data Structures/Algorithms (DSA), Microservices, RESTful APIs, OOP, CI/CD, Agile, Jira, Prompt Engineering**

Education

State University of New York at Buffalo

August 2024 – December 2025

Master of Science in Computer Science, GPA: 3.6/4

Buffalo, NY

Rajiv Gandhi Proudhyogiki Vishwavidyalaya

August 2017 – July 2021

Bachelor of Engineering in Computer Science, GPA: 7.7/10

India

Certifications

AWS Cloud Practitioner Essentials : Amazon Web Services
